Professional Summary

I am a Technology evangelist and Solution architect operating at the intersection of People, Process and Technology. With a strong record of delivering automation, Copilot adoption and cost-optimised business solutions, I Combine hands-on delivery (Power Automate, Power Apps, Copilot Studio, Dataverse, Fabric) with pragmatic governance and business value delivery. Known for creating clear training and enablement programmes to support digital transformation, securing executive buy-in, and delivering measurable time and cost savings.

I've a strong track record of helping organisations select and use technology — not for the sake of it, but to solve real business problems — translating 'what's possible' into things teams can actually adopt and benefit from.

Core Skills

- Microsoft Certified: AI Transformation Leader
- Business Analysis and Optimization – Understanding People, Process & Technology
- Product Leadership & Delivery: stakeholder management, process mapping, change and adoption
- Power Platform: Power Automate, Power Apps, Copilot Studio, Dataverse
- AI & Copilot Adoption: Training, enablement, usage guardrails
- Data & Analytics: Microsoft Fabric foundations, Power BI enablement, reporting strategy

Independent AI and technology Consultant | Self Directed development | March 2026 – Present

A committed period of focused building, learning, and community contribution across AI and Microsoft technologies.

- Passed the Microsoft Certified: AI Transformation Leader exam
- Designed & Built a Broadbean/WordPress plugin enabling any website to function as a fully operational job board
- Developed an AI powered Recruitment CRM as a Power Apps Model Driven App with advanced skills matching
- Built a portable virtual expert panel for Power Platform, AI, and Data Engineering inside Claude
- Created a local RAG AI assistant capable of reading private documents entirely offline
- Connected Claude to Power BI via MCP and documented the process publicly for the community
- Launched a YouTube channel with 16 tutorials spanning beginner to advanced Microsoft solutions
- Providing ongoing daily support to professionals navigating Microsoft technologies

Technology Evangelist | RSS Global | April 2025 – Feb 2026

The role focussed on digital transformation. I'd understand business pressures and bottlenecks, identify suitable technology that could assist, demonstrate its effectiveness, get business buy-in, put solutions in place, then promote them.

- Designed a scalable Microsoft Fabric infrastructure and delivered an "art of the possible" POC; obtained Microsoft funding to upskill internal staff and avoid ~£500k in external development costs.
- Enabled single-source-of-truth reporting using group data, with AI-readiness for predictive insights.
- Secured executive buy-in and delivered a 75-user Copilot pilot with appropriate training and governance, unlocking an estimated 17,000 hours saved annually.
- Developed and delivered Copilot training to 100+ staff; co-authored AI usage policies to create safe, consistent adoption.

- Saved £60k and identified a further £70k in licensing optimisation opportunities across the group.
- Created training materials critical to a Google-to-Microsoft migration, reducing risk and accelerating adoption.
- Provided Power Platform guidance and pragmatic governance for IT. Developed automation solutions and trained others do the same across IT, Finance, Legal & HR. This led to streamlined processes and reduced manual effort whilst increasing operational throughput. Some examples: Automation meant Finance invoices were processed with less manual effort. Bids & Tenders teams used copilot agents to respond to tenders - increasing productivity for stretched teams. Legal were able to avoid expensive software costs and used SharePoint with automation to collect, process, manage and report on legal cases. A stretched HR team used agents to provide answers to commonly asked questions. IT had greater visibility over the types of Issues users presented – This data enabled business analysis and ultimately led to process change, Saving money and improving service.

IT Business partner (Secondment) | RSS Global | Feb 2024 – March 2025

Selected by group CEO to lead digital enablement of new premises and colleagues due to rapid growth. They needed someone that could set them up to succeed from day 1, ensuring Hardware & Infrastructure was in place & new staff were onboarded.

- Supported rapid growth: delivered IT fit-out for 6 new offices and equipped 50 new staff, including resilient networking.
- Mapped key business processes and delivered automation to simplify lead and task management. The small Talent Acquisition team were drowning in applications and there was no budget for an ATS – So I enabled them with a low code solution.
- Developed and delivered Power BI training to improve self-service analytics and reporting capability.

IT Product Leader | RSS Global | Apr 2023 – February 2024

- Identified and delivered £500k+ in cost and efficiency savings within six months through platform rationalisation and process improvements.
- Led migration for seven recruitment websites, ensuring continuity and performance. Following a business restructure we were left with 12 weeks to deliver a platform migration whilst maintaining usability and SEO coverage over 1000's of pages.
- Delivered solutions supporting the organisational split (IPEL/RSS) and scaled IT capabilities for automation initiatives; trained multiple staff to reduce outsourcing needs.

IT Product Owner | Impellam group | Nov 2020 – Apr 2023

- Member of the Groups Shadow board and the IT Extended Leadership Team. Championing digitisation whilst developing solutions that would increase efficiency and bring the group closer together.
- Selected to participate in the Virtuoso future leaders program by CIO.
- Led a key project to Implementing a group-level MS Dynamics Applicant Tracking System. I worked with The CEO, Group HR Directors and Talent acquisition leaders from APAC the UK and US. I ran this as an Agile project, collecting requirements, prioritising them, delivering baseline functionality in 12 weeks, then training the teams (around 20 people) to use it. Once the team were happy with the product, I developed an IT colleague and began handing over day-to-day product ownership.
- Operationalised technology & data privacy impact assessments (DPIA), strengthening regulatory compliance. I worked with Legal and IT Leaders to understand the conditions they used to evaluate new technologies. Then mapped out a process for the collection and evaluation before delivering an automated solution.

Martin Fairall 07789 768648 | Fairall@hotmail.co.uk | https://learn.microsoft.com/en-us/users/martinfairall/
https://www.linkedin.com/in/martinfairall/

- Group Level SME for Microsoft Power Platform. (Copilot studio, Power automate, Power apps, Fabric)
- Introduced process mining to help uncover and prioritize opportunities for continuous improvement and better operational efficiency using data to compare actual, assumed and ideal process workflows.
- Delivered groupwide presentations and 1:1 "art of the possible" sessions with staff at all levels including the CEO.

IT Business Partner for Marketing | MGG – (Part of Impellam Group) | Apr 2020 – Nov 2020

- Initiated closer collaboration between IT and Marketing to improve candidate experience and marketing agility.
- Introduced chatbots, online booking tools, and low-code automation/app/AI technologies.

Digital Marketing Manager | MGG – (Part of Impellam Group) | Apr 2014 – Apr 2020

- Led creative planning and introduced data-driven concepts such as true cost per acquisition and test-and-learn.
- Coached a team of 8; improved customer journeys, lowered marketing costs and increased conversions.
- Trained an apprentice and drove integrated digital campaigns.

Web Development Manager | Best Western Hotel Group | Jan 2013 – Dec 2013

Marketing / E-Commerce Manager | The Office Supplies Supermarket (Online Retailer) | Jan 2011 – Dec 2012

- Accountable for sales & margin performance; used data to secure two years of staff bonuses.

Website Developer / Project Manager / Creative digital advertising | PCD Advertising Agency | Jun 2007 – Dec 2010

Multimedia / Website Developer | Lee & Isle Marketing agency | Jun 2003 – Jun 2007

Multimedia / Website Designer | Runecraft (Computer Games Company) | Sept 2001 – Jun 2003

Professional Qualifications

- Multiple Microsoft Qualifications | See link in header.
- Microsoft Certified: AI Transformation Leader
- Certified Scrum Product Owner | Scrum Alliance | Apr 2019.
- Prince 2 | Foundation - May 2008
- Prince 2 | Practitioner - Sept 2009
- MSc Multimedia Applications (Distinction) - Teesside University
- BSc (Hons) Information Society - Teesside University
